Golden Showers

(P. A. F.) 1957 A. A. R. S. WINNER

FIRST PILLAR & CLIMBING ROSE IN 16 YEARS TO WIN THE NATIONAL ALL AMERICA AWARD NO OTHER ROSE HAS ALL THESE SPECTACULAR FEATURES

LEADING ROSARIANS AGREE: "NO OTHER ROSE LIKE THIS IN FLORICULTURAL HISTORY."

Since 1941, no other rose in this class has combined sufficient beauty, hardiness, and flowering qualities to win this award.

GOLDEN SHOWERS is the first winter-hardy, everblooming Pillar and Climbing rose that blooms continuously from early spring until late fall. GOLDEN SHOWERS lends itself to any landscape treatment; as a beautifully arching, self-supporting Pillar Rose, 8 to 10 feet tall, it has literally a shower of golden flowers.

Trained as a climber, this 1957 A.A.R.S. winner will reach up and along a trellis or a fence. Or, it can be shaped as an eye-level symmetrical bush.

The buds and flowers are enchanting, combining exquisitely shaped daffodil yellow, long pointed buds with fragrant, high centered, 25 to 30 petaled, 4½ to 5 inch yellow open blooms. Almost thornless, with long beautifully decorative bronze cutting stems, Golden Showers lends itself to spectacular cut flower arrangements.

In the short time when blooms are waiting to burst forth in golden splendor, the plant is magnificently clothed clear to the ground with large, dark green, glossy foliage. Golden Showers is so vigorous that it is highly resistant to rose diseases such as mildew and black spot.

NEW! A 3 WAY FUNCTIONAL ROSE

The Only Variety That Can Be Grown 3 DIFFERENT WAYS!

The rose that started an entirely new trend in all-rose landscape design for the modern home

Golden Showers

1. As a self-supporting Pillar Rose—By allowing the canes to remain unpruned for two years, the tops of the canes arch over very gracefully, creating a compact Pillar Rose 8 to 10 feet high. The abundance of golden yellow flowers is truly breathtaking from the first breath of spring!

[2]

2. As an Eye-Level rose bush—By pruning away the two-year-old wood canes at the base each spring—and heading back the year-old canes to about five feet—growth is restrained. This results in a beautifully symmetrical plant with a profusion of daffodil yellow blooms at eye level.

3. As a WINTER HARDY Everblooming Climber—One may also train the canes against a building or trellis as a regular climber, arching them over to produce hundreds of gorgeous blooms that rival the finest Hybrid Teas!

Las Vegas

(Pat. 1486)

ALL THE WARMTH AND GLOW OF A DESERT SUNRISE FOR THE FIRST TIME CAPTURED IN A ROSE.

The LAS VEGAS, Germain's exciting new rose introduction for 1957, is a radiant warm salmon pink with a golden sheen at the base of each petal. The large, long pointed buds open into high centered blooms revealing the warm glowing color of the rose. As the blooms further develop the petals cup and the spectacular color becomes more intense, giving an even deeper radiance to the flower. The blooms, measuring up to 6 inches across, are produced freely on exceptionally long cutting stems. LAS VEGAS is a truly long lasting cut flower that will bring its radiant beauty into your home for days longer than most roses.

Petals have a satiny lustre that imparts a depth and warmth to the bloom, such as that seen in a desert sunrise.

The plants bearing these gorgeous flowers are vigorous and well branched. The foliage covers the plant well, with semi-glossy dark green leaves.

THE MIRACLE LAWN

Germain's SENSATIONAL—NEW

Kolorcoat* DICHONDRA

*Reg. U.S. Pat. Off.

- Deep, Rich Green All Year
- Resists Rough Usage
- Requires No Mowing
- Forms Dense Turf
- Chokes Back Bermuda
- Thrives in Sun and Shade

Dichondra is a low-growing American plant, native to the southeastern part of the United States, from Virginia south. It is known botanically as Dichondra Repens or D. Repens var. Carolinensis.

Germain's Kolorcoat Dichondra makes a dense sod by means of runner-like stems, growing very close to the ground, but never forms a thick mat like bermuda grass. The kidney-shaped leaves, about ¼ in. wide, and seldom over 1½ in. tall have a rich, dark velvety-green color. Dichondra is tough in texture and hard usage will not injure the strong turf or mar its beautiful appearance.

In mild climates dichondra can be started any time of the year. Since summer is the best growing season for Dichondra spring or early summer planting gives quickest results. When planting during the colder months a nurse crop is suggested.

In the East or Middle West we recommend spring or early summer planting. This allows enough time to develop a strong root system for the plants to make seed. When the foliage and top growth is hurt by rigorous weather the lawn will then renew itself from the roots and self-sown seeds.

You can plant Germain's Beautilawn Dichondra right in your old lawn and within two years you will have a dichondra carpet. When planting a new Beautilawn Dichondra lawn it should be sown with clover for best results.

Ideal for borders, low beds or pot plants, Red Satin was also acclaimed the best flowering plant introduced for commercial use at the 1956 California International Flower Show.

Germain's is proud to present the FIRST ALL America Camellia Selection Winner in Horticultural history. An All America Camellia Selections has been formed to judge and select the very finest of the new Camellia introductions. Each year (provided the new introductions are a winner) you can get brand new varieties never offered before, just like the All America Roses.

This is the first year in the history of horticulture that an All America Camellia Selection has been offered to the public.

CINDERELLA has the distinction of being the FIRST Camellia to win such an award. The large semi-double blossoms are deep carmine at the base and gradually blend to pale rose, which in turn blends into silky white at the tips of the petals. Tips are ruffled and deeply notched, and the fresh creamy stamens make this a most beautiful flower. Blooms are produced freely on handsome stocky plants with bright emerald green foliage.

GERMAIN'S IS FIRST AGAIN!

GLADIOLUS BULBS

FROM COOKED PLANTING STOCK!—By this we mean these bulbs were produced from smaller bulbs or bulblets that were hot water treated. Yes, actually immersed in hot water to destroy disease common to gladiolus such as fusarium, crown rot, bacterial scab, and the minor diseases. This process, now perfected, has proven a boon to the gladiolus industry. A clean bulb produces a much better flower and is a heavier propagator than the untreated gladiolus.

SPECIAL NOTE: Only collections No. 5226 and No. 5227 are processed from cooked planting stock.

SELECTION NO. 1 — DELICATE SHADES

LADY JANE—Clear cream with yellow lip petals. Lightly ruffled and heavy textured blooms open to seven florets on a medium height spike.

BEAUTY'S BLUSH—A delicate pink blush overlaying a frosty white. Opens to eight plain petaled round florets on a tall spike.

ELIZABETH THE QUEEN—A beautiful ruffled lavender with deeper lines in the throat. The most popular of the lavenders for cut flowers.

FRIENDSHIP—A beautiful soft pure pink, shading to a cream throat. The exquisitely ruffled blooms open six to eight on a straight medium height plant.

SNOW PRINCESS—A very fine white of good size and form. Tall, with long flowerheads and many open blooms that are always perfectly placed.

Remember to cut them in the cool of the day, leaving them in water over night, or for a period of not less than four hours before arranging. Also, be sure to cut any dahlia when it is fully mature.
